

## 1900 series Non-Tilt Single Hung Windows

---

Homes Sell Faster When High  
Quality Is Your Standard

---

Insulating Spaceglass® Increases  
Comfort While Decreasing Energy Bills

---

General Aluminum's Single Hung Windows is one of the most popular windows ever built. That's because it offers the features homebuyers want most - precision crafted construction and high energy efficiency.

---

Their Single Hung Windows are manufactured with General Aluminum's energy efficient, insulations Spaceglass- which means there is virtually no heat or cold transmission through the window. The sealed design of Spaceglass not only reduces heat loss in the winter and heat gain in the summer, it also minimizes outside noise penetration and prevents drafts.

1. Fast installation with 1" nailing fins at jambs, head and sill of frame.
2. Easily adjustable spiral sash balances.
3. Sash stops of extruded aluminum permanently attached to jambs.
4. Springs applied to window screens for tight fit.
5. Strong, positive lock snaps firmly into place or protection against intruders.

Low-E with Muntins

1900 U-Value .63

1970 U-Value .55

**Glazing for 1900/1970 Series:** Window units shall be factory glazed and sealed, insulating Spaceglass®.
